

# Aztec<sup>®</sup> Castle Chair<sup>™</sup> - PCC

## DESCRIPTION

Dayton Superior manufactures a complete line of rebar and/or mesh supports. All Dayton Superior rebar supports are manufactured to the recommendations or specifications of the Concrete Reinforcing Steel Institute (CRSI).

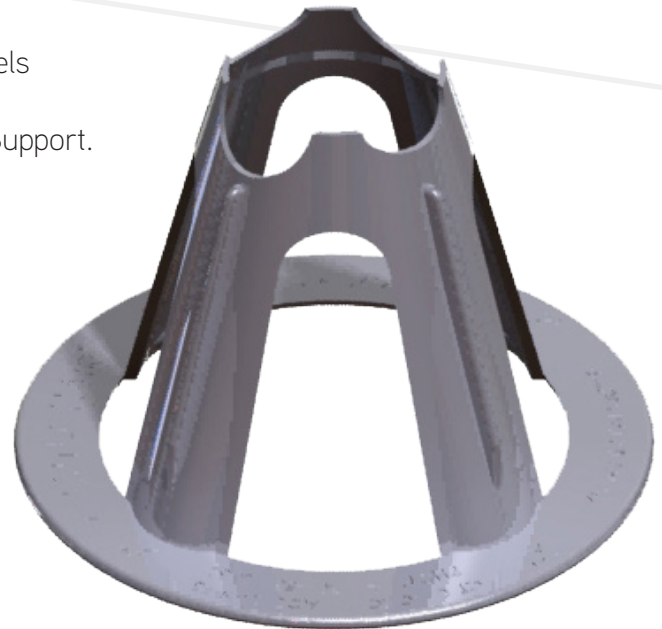

## FEATURES & BENEFITS

- Most stable on-grade chair available.
- Heavy-duty, stackable design.
- Fits up to #8 rebar and supports over 500 lbs without damaging moisture protection membranes.
- Perfect for use on insulating foam or non-penetrable vapor barriers.
- Uniquely designed with a wide base ring to provide stability on poorly compacted or expansive soils.
- Each chair comes in two height combinations reducing inventory and allowing for grade variation.

## PRODUCT DATA
