

MAX-A-FORM® HANDLING HOOK

June 4, 2014: Dayton Superior is introducing a new product which will make the lay-down and stacking of Max-A-Form panels easier and more efficient. The new Max-A-Form Handling Hook slides into any rail slot quickly and easily without the need of bolts, nuts, or other loose hardware.

Each Handling Hook is rated for a Safe Working Load of 650 Lbs., with a 5 to 1 Factor of Safety. This allows a total pick of 2,500 Lbs. with four (4) Handling Hooks.

The new Handling Hooks can be attached to customer supplied rigging allowing for quick and easy panel layout as product arrives on site and when it is being prepared for return.

Product break down is:

Product Code	Description	Price (Each)	Weight (Lbs.)
F1409100	Max-A-Form Handling Hook	\$32.00	4.40

Please contact your local Dayton Superior Sales Representative or Customer Service for availability.
