

# CASICA ALPHA 1 Color Chart

*Looking for a long-term bond?*

## We've got you covered!

Casica Alpha 1 is a one-component, non-sag MS hybrid sealant that is ideal for a wide range of applications where a long-term, durable seal is required. Its very low odor which makes it ideal for use in confined or occupied work spaces. Hybrid technology allows for bonding and sealing across a wide range of temperatures; Alpha 1 can withstand moisture, performing well in damp and wet environments.

**Contact your Dayton Superior representative for more information.**

- **Non-sag, vertical/overhead applications**
- **Resistant to UV degradation and weathering**
- **Will not wash off with rain or moisture, cures even when water is present**
- **Paintable within 24 hours of application**

Alpha 1 can be used on a variety of substrates. Please inquire or test your substrates before use. Some common substrates include:

- Ceramics
- Fiberglass
- Glass
- Granite
- Marble
- Aluminum & Galvanized Metal
- Wood
- EPDM
- EPS or Styrofoam Insulation
- Porcelain
- PVC & Other Plastics
- Porous Surfaces (Concrete, Brick, Etc.)

*Refer to the product's current technical data sheet for color and size availability.. Colors are a close CMYK simulation but will not be exact due to the printing process..*
