

B30 Screw-On Plastic Cones

DESCRIPTION

Dayton Superior Screw-On Plastic Cones are designed to thread onto the protruding coil of a B3 Screw-On Coil Tie.

FEATURES & BENEFITS

- The large end of the cone provides sufficient bearing surface to prevent crushing of the plywood around the bolt hole.
- Cones are to be used for spreader action only and are not designed for scaffold bracket or other accessory loads.
- Plastic cones are removed from the concrete with a B15 Cone Removal Wrench and can be reused.
