

## Clean Strip™

### DESCRIPTION

Dayton Superior offers the industry's widest selection of high performance, ready to use, quality concrete form release agents on the market. Formulated to exceed the environmental, regulatory and jobsite challenges of architectural, precast and general concrete forming applications.

### FEATURES & BENEFITS

- Reduces the surface tension at the form interface, allowing air to migrate upward reducing bug holes
- Available in 5G pails, 55G drums and 275G totes
- Formulations that ensure the widest variety of forming materials strip easily and provide smooth architectural surfaces.
- Repeated use extends the form life providing a positive return on investment.
- Premium, low odor raw materials keep the workforce clean on and off the jobsite.
- Ideal for both interior and exterior applications.

### PRODUCT DATA
