Superior Deal of the Month...
each month is a **brand new offer!**

1924 STRUCTURES - Middlebury Gorge Arch Bridge

We'd like to continue our quick dip into our *100-year history celebration* with a look at the Middlebury Gorge Arch Bridge in Vermont. This historic concrete bridge was completed in 1924 and is still a well-preserved example of an early 20th century bridge.

Located in Middlebury, VT, the bridge consists of a semicircular arch made out of reinforced poured concrete, connecting a narrow gorge in the Green Mountains. Its span is 42 feet, with a total structure length of 49 feet. It reaches 34 feet in height and has a width of 24 feet, carrying two lanes of traffic.

The bridge was built out of eight separately poured concrete sections, using locally sourced materials.

It was listed on the [National Register of Historic Places](#) in 1991.

TRAINING ON *YOUR* TERMS

In 2022, we took a step forward to expand our training reach by offering live webinars every Tuesday. These free 30-minute sessions are geared to improve your knowledge and understanding of definitive construction industry essentials and topics.

Conducted by our product experts, each offers a Q&A session and allows you to learn on a quick timeline.

This program has proven to be extremely popular, but we know that lunchtime on a Tuesday isn't always an option for everyone's schedule. Our Dayton Superior YouTube channel offers past trainings so you can review and learn on your own time.

At almost 100 trainings available (**and growing**), we hope you will take advantage of the option to expand your product knowledge.

TRAINING TUESDAYS ONLINE *...and on demand*

The sign-up and information on our weekly trainings can be found on our website - [click here](#) or scan the QR code.

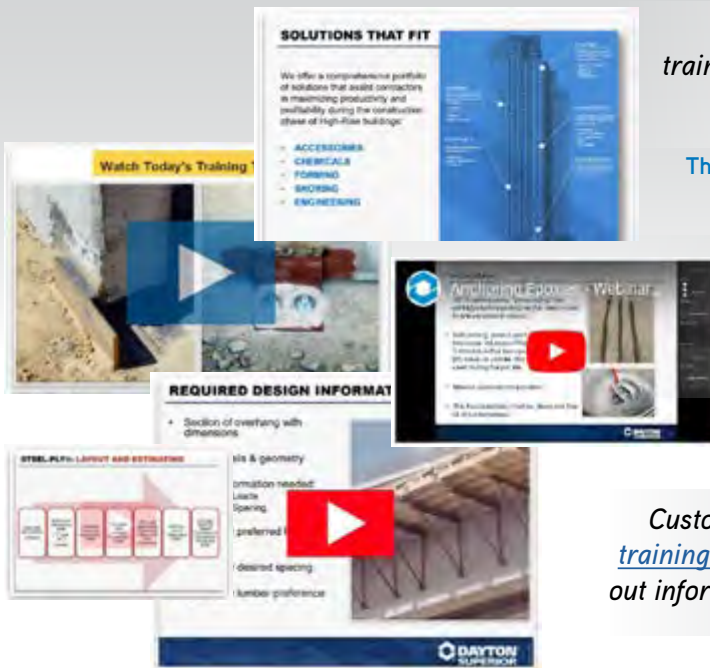

The live trainings take place each Tuesday at 1pm EST.

To review past trainings at your convenience, they have been uploaded to our YouTube channel under the 'training' playlist - [click here](#) or scan the QR code.

Customized trainings are available - please contact training@daytonsuperior.com or [scan the code](#) to find out information on upcoming sessions and availability.

SUPERIOR DEAL OF THE MONTH

Have you been following along to see what the **Superior Deal of the Month** is featuring? If not, you are missing out.

Every month is a **NEW DEAL**, with a new chance for you to save money on our accessories and chemicals.

Stay tuned and be sure to [check our website](#) each month to see what current promotion we are offering! You can also find out the latest news and deals by checking our social media channels.

Featured SURE LIFT™ EX BOND BREAKER

- Chemically reactive
- Good resistance to rain and weather
- Panels lift easily and cleanly with minimal panel residue
- Resists construction foot traffic
- Red dye incorporated for easy placement and full coverage

Sure Lift™ EX is a reactive and membrane forming exempt solvent-based bond breaker for use in tilt wall construction.

A special formula of proprietary ingredients, it's designed to provide clean and effortless lifting of tilt panels. It is perfect for use in VOC restricted areas with less than 350 g/L VOCs and is compliant with all Canadian, EPA, OTC, LADCO and CARB VOC regulations. [Learn more here.](#)

DOT APPROVALS - SIMPLIFY YOUR SEARCH

A reminder that Dayton Superior offers a DOT Approval Search Tool. Simply select the 'Resources' tab on the Dayton Superior homepage, then go to Online Tools --> DOT Approvals

The interactive map allows customers to simply select the relevant state or province and it populates a list of approved products including links to all pertinent information.

This list can be filtered further into Accessories (Rebar Supports, Splicing, and Other Accessory) and Chemicals (Epoxies, Liquids, Powders). [Click here to check it out!](#)

SUPERIOR SPOTLIGHT ON: NATHAN GOOCH

Let's continue our chemical chat with one of our spotlight stars.

Nathan joined the Dayton Superior chemical team in 2019 as a Technical Service Specialist. His product knowledge and dedication brought him to our corporate office in Miamisburg, OH with a promotion to Associate Product Manager for our chemical line last year.

A proud USAF veteran, Nate enjoys fishing, playing golf and watching movies in his free time. Preferring college sports over pro, he has to root for his hometown team of the Kansas State Wildcats.

Nate's been a wonderful addition to our expanded chemical team - he can be reached at nathangooch@daytonsuperior.com.
