

## CUSTOM FORMING SOLUTIONS FOR HIGH PROFILE HIGHWAY PROJECT IN DALLAS COUNTY, TEXAS

Construction began on the busy stretch of highway between Highway 75 and I-30 in East Dallas in 2020 and expected to be completed in 2024. The project (known as the 635 East Project) is 11 miles long and includes a major interchange at I-30 and I-635. The total project is estimated to be worth \$1.74 Billion dollars.

The Symons® Team has worked closely with the Joint Venture group Pegasus Link Constructors from the Pre-Bid Stage to provide solutions for this high-profile project. Some of the challenges to overcome were short timeframes and traffic patterns during construction of the bridges.

One such challenge was constructing a Long Span Heavy Straddle Cap that has less than 3' of clearance below the cap and spans over live traffic. The team was able to come up with a design that would meet the challenge using Heavy Duty Max-A-Form® STS with custom tension and compression beams to meet

moment loads and control deflection. This included custom 400 Kip offset support brackets to accommodate the 16' Soffits. The wide Soffit provided a safe working area for tying rebar, setting Inverted T Form and Post Tensioning.

*Photos of the 635 East Project under construction with the Symons forming system and accessories (top) and after the forms were removed (below)*

Besides this large custom Straddle Cap, Symons also provided various other forming solutions for the project. These included Column Formwork, Hammerhead Caps, smaller Straddle Caps, Yoked Inverted T Caps on Dance Floors, Typical Multi-Column Caps, as well as forms for the abutments and footings.

No matter what the project entails, the Team at Symons is ready to provide best-in-class engineered solutions that will keep your project on time AND within budget as well.

# INDIANAPOLIS FACILITY - MIDWEST LOCATION, NATIONWIDE SERVICE

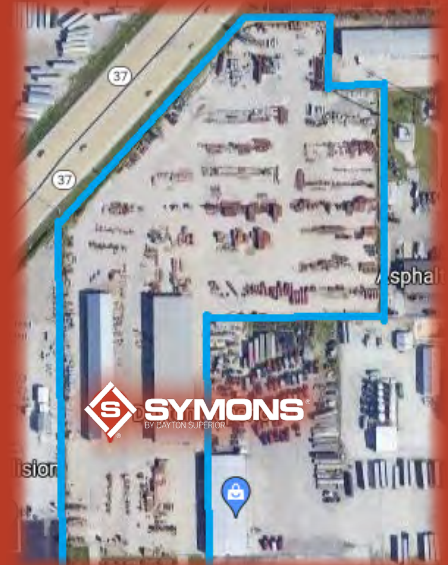

Our Indianapolis facility (10 1/2 acres in central Indiana) has been providing forming products to our customers for the last 20 years. This location has traditionally focused on heavy forming, but it also maintains a versatile fleet of light forming, jump systems, shoring products, and even flex form for all the wastewater tanks and circular or curved forming products.

The team in Indy consists of Branch Operations Manager - J.W. Parker, Customer Service Representative - Karman Williams, Forming Sales - Craig Wahl, along with a wellness experience work force with over 72 years of combined knowledge.

Although the Indianapolis facility primarily serves the local regions, they often ship nationwide due to their unique and varied assortment of forming systems.

Our Indy team is committed to our customer's needs and goes above and beyond to make sure our customers are satisfied! Reach out today at 317-781-1503.

## SYMONS SQUAD: MEET YOUR TEAM (TIMES TWO!)

*We have two new team members on our squad, so let's take a moment to introduce them.*

### Chris - Central Texas

Chris Pollock spent over 20 years as a Symons dealer in Ohio, so we feel safe saying that he knows his stuff! Now located in Texas, he has joined our team as a Contractor Sales Manager to cover the South Central Texas region and bring his expertise to you.

He has three wonderful children and in his free time he enjoys working out and playing golf whenever he possibly can. You can reach him at 737-212-4368 or [ChrisPollock@daytonsuperior.com](mailto:ChrisPollock@daytonsuperior.com).

### Rob - Virginia, North & South Carolina

With over 20 years in the construction industry, Rob Whitten has some vast knowledge under his (tool) belt. Offering ten years in underground materials, five in safety equipment and seven in concrete forming and shoring, we are glad to have him as a Contractor Sales Manager for the regions of Virginia, North Carolina and South Carolina.

Born and raised in the Pittsburgh area, you can guess that he is a fan of all Pittsburgh sports teams. He also likes to occasionally "ruin a beautiful afternoon with a round of golf." You can reach him at 919-356-6466 or [RobWhitten@daytonsuperior.com](mailto:RobWhitten@daytonsuperior.com).

## DID WE SEE YOU AT THE CANADIAN CONCRETE EXPO?

The Canadian Concrete Expo took place at the International Centre in Toronto on May 18 & 19.

We were thrilled to participate and showcase our Symons [Sym-Ply®](#) and [Steel-Ply®](#) forming systems in booth 2466.

Attendees participated in conference sessions, demonstrations, stage presentations, a scavenger hunt and more. To learn more about the expo, or to plan for next year's show, [please click here](#).
