DAYTON SUPERIOR ADDS HIGH CAPACITY BRACE TO TILT UP PORTFOLIO

DAYTON, Ohio, July 22, 2014 – Dayton Superior is adding the B18 Tilt Up Brace to the company's tilt up line of product solutions. The newly launched B18 brace was independently tested for capacity at the University of Illinois Urbana-Champaign campus. The test results confirmed that the B18 brace is the only 52' long tilt up brace with a Safe Working Load of 12,800 lbs., making it nearly 20% stronger than any competitive brace available in the tilt up construction industry.

The B18 brace is engineered for quick, easy alignment and bracing of tilt wall panels. It also allows for the use of taller tilt up panels while increasing efficiency and advancing the opportunities for innovative design.

“As the wall panels used in tilt up construction continue to get larger and taller, there is increased demand for longer and stronger braces,” explained Estella Matemu, Product Manager with Dayton Superior. “The B18 now leads the industry in high capacity. For the contractor, this reduces the number of braces and accessories required for a tilt up panel, resulting in a cost savings.”

###

ABOUT DAYTON SUPERIOR CORPORATION

Dayton Superior is celebrating 90 years as a leading provider of accessories, chemicals, forming and paving product solutions to the nonresidential concrete construction industry. Their portfolio includes over 17,000 standard, in-stock items, a network of 15 distribution centers and 13 manufacturing facilities allowing Dayton Superior to serve their customers as a single source provider of high quality products and services. Dayton Superior products are found on infrastructure, institutional and commercial construction projects across the world. With the 2014 opening of their Innovation Center, Dayton Superior will assess, evaluate, prototype and launch new products at an industry leading pace to transform industry productivity through innovation and create a competitive edge for their customers.
