### **Dayton Superior Adds Bar Lock<sup>®</sup> D252L End Anchor to Accessories Product Portfolio**

**Dayton, Ohio Jan. 20, 2015** – Dayton Superior Corporation, the leading North American provider of engineered product solutions for the nonresidential concrete construction market, is launching the latest addition to their accessories product portfolio, the Bar Lock D252L End Anchor.

The Bar Lock D252L End Anchor offers Type 2 splicing capabilities and is used to provide embedment anchorage while offering an additional degree of installation flexibility. It can easily be moved to an out-of-the-way position on rebar when needed, then slipped back into the final installation position. The Bar Lock D252L also allows for installation in an inverted position.

“This new Bar Lock D252L end anchor is closely related to Dayton Superior’s Bar Lock<sup>®</sup> D251L and provides customers with additional options on the jobsite,” said Ryan Rostetter, Dayton Superior Product Manager for the Bar Lock product portfolio. “The value of the Bar Lock D252L is particularly relevant when mid-job engineering changes require an impromptu solution because it offers the flexibility to be positioned anywhere along the bar, even in heavy rebar congestion situations.”

Additionally, installation of the Bar Lock D252L can be done on the job site without any special preparation requirements, saving the contractor time and labor costs.

###

### **ABOUT DAYTON SUPERIOR CORPORATION**

Dayton Superior is a leading provider of accessories, chemicals, forming and paving product solutions to the nonresidential concrete construction industry. Their portfolio includes over 17,000 standard, in-stock items, a network of 15 distribution centers and 13 U.S. manufacturing facilities allowing Dayton Superior to serve their customers as a single source provider of high quality products and services for over 90 years. Dayton Superior products are found on infrastructure, institutional and commercial construction projects across the world. With the 2014 opening of their Innovation Center, Dayton Superior will assess, evaluate, prototype and launch new products at an industry leading pace to transform industry productivity through innovation and create a competitive edge for their customers.
