Dayton Superior Recognized by Bechtel for Outstanding Performance *Company Honored for its Commitment to Excellence and Quality*

DAYTON, Ohio, February 27, 2014 – Earlier this week, Bechtel recognized Dayton Superior for their commitment to excellence and quality through outstanding performance on power projects. Dayton Superior received the award at Bechtel's Subcontractor & Supplier Recognition Dinner, held on Tuesday, February 25 in Frederick, Maryland. These awards recognize suppliers supporting Bechtel Power's communications, renewable, transmission, nuclear and thermal projects in 2013.

"It was an enjoyable evening and an honor for Bechtel to recognize that Dayton Superior shares their commitment to excellence, integrity, innovation and performance," said Jim McRickard, Dayton Superior's President and CEO. "Bechtel is among the most respected global leaders in engineering, procurement, construction and project management. They are able to be selective in their partnerships and choose those that adhere to the highest standards. To be named among their best suppliers is a privilege."

Dayton Superior is currently working with Bechtel on the Sabine Pass Liquefaction (LNG) project in Cameron Parish, Louisiana. Dayton Superior has provided approximately 80 truckloads of forming equipment to the ongoing project. Dayton Superior is also supplying product to a Bechtel LNG project in Angola. Other projects for which Dayton Superior has served as a supplier to Bechtel include: the Panda Temple Power project in Temple, Texas, the Panda Sherman Power project in Sherman, Texas; the Bluegrass Army Depot Chemical Weapons Site Cleanup project in Richmond, Kentucky; the Hanford Tank Waste Treatment and Immobilization Plant project in Hanford, Washington, that will serve to process and stabilize 56 million gallons of radioactive and chemical waste; and the Dulles Metrorail Expansion project in Washington, D.C.

"Subcontractors and suppliers play a critical role in our ability to deliver projects to our customers with the highest levels of safety, quality and ethics," said Toby Seay, President of Bechtel's Power Global Business Unit. "The expertise and innovation they bring are essential to a project's success."

To receive this esteemed recognition from Bechtel, suppliers are evaluated on multiple factors. These include: overall performance; the ability to deliver quality products on time; the ability to work collaboratively to meet milestones; meeting or exceeding project expectations in aspects of safety, construction performance, technical expertise and environmental compliance. Companies are nominated for the award by Bechtel project procurement and contracts managers with final recommendations approved by senior leadership within Bechtel.

###

ABOUT DAYTON SUPERIOR CORPORATION

Dayton Superior is celebrating 90 years as a leading provider of accessories, chemicals, forming and paving product solutions to the nonresidential concrete construction industry. Their portfolio includes over 17,000 standard, in-stock items, a network of 15 distribution centers and 13 manufacturing facilities allowing Dayton Superior to serve their customers as a single source provider of high quality products and services. Dayton Superior products are found on infrastructure, institutional and commercial construction projects across the world. With the 2014 opening of their Innovation Center, Dayton Superior will assess, evaluate, prototype and launch new products at an industry leading pace to transform industry productivity through innovation and create a competitive edge for their customers.
