Dayton Superior Announces Investment in Toronto Service & Distribution Center

Dayton, Ohio Jan. 9, 2015 – Dayton Superior Corporation has announced today that the company will invest in a 7,300 square meter (79,000 sq. ft) service and distribution facility to house their Toronto operations.

The new facility will house Dayton Superior’s Toronto sales, applications services and distribution teams. Furthermore, the new facility allows Dayton Superior to move Toronto’s forming inventory to indoor storage versus utilizing an outdoor forming yard.

“The new Toronto facility will provide additional value for our Canadian customers,” Jim McRickard, President and CEO of Dayton Superior stated. “Our ability to warehouse our forming systems indoors protects the equipment from the elements. For our customers, this means our forming systems are stored in optimal conditions to ensure high quality performance on the jobsite.”

Dayton Superior’s new Toronto service and distribution facility is slated to open by the end of January.

###

ABOUT DAYTON SUPERIOR CORPORATION

Dayton Superior is a leading provider of accessories, chemicals, forming and paving product solutions to the nonresidential concrete construction industry. Their portfolio includes over 17,000 standard, in-stock items, a network of 15 distribution centers and 13 U.S. manufacturing facilities allowing Dayton Superior to serve their customers as a single source provider of high quality products and services for over 90 years. Dayton Superior products are found on infrastructure, institutional and commercial construction projects across the world. With the 2014 opening of their Innovation Center, Dayton Superior will assess, evaluate, prototype and launch new products at an industry leading pace to transform industry productivity through innovation and create a competitive edge for their customers.
