

Bridge-Werks™

Smart Software for Simple to Complex Bridge Deck Design

Built for challenge. Designed to deliver.

Bridge-Werks™ simplifies the complex.

Developed specifically for non-standard loads and custom bracket configurations, Bridge-Werks™ gives bridge engineers and contractors the flexibility, speed, and precision they need to design with confidence.

Bridge-Werks™ helps you:

- Easily analyze custom hanger and bracket setups
- Input non-standard loading conditions
- Get clear, detailed output and loading reports
- Accelerate your workflow without sacrificing accuracy
- Bridge the gap between design and field teams with better communication

Why Bridge-Werks™?

- **Handles what others can't.** Built to manage real-world project complexity.
- **Made by experts, for experts.** Designed with your toughest jobs in mind.
- **Flexible by design.** Custom inputs mean no more workarounds or compromises.
