

PLYWOOD EDGE SEAL (GRAY)

Description:

Symons® Plywood Edge Seal is a specially formulated sealer designed to protect and preserve high quality; multiple-use overlay panels throughout multiple pours of concrete. Symons Plywood Edge Seal is a safe, easy to use water-based coating, contains no VOC's, and easily cleans up with soap and water.

Features:

- High moisture resistance
- Excellent resistance to oil and alkali in concrete
- Resists adhesion of concrete

Benefits:

Sealing the edges of plywood protects the edges from swelling, delaminating or becoming uneven when used in a concrete application. Because Symons Plywood Edge Seal resists concrete adhesion cleanup of excess concrete and residual dusting is a breeze.

Application:

Symons Plywood Edge Seal can be applied with either a conventional air spray or airless spray. Edge Seal can be dried at ambient temperature or accelerated drying can be done through command drying sources.

Clean up:

Do not allow Symons Plywood Edge Seal to dry prior to clean up. Soap and water is all that is needed for clean up of the spray equipment. For other cleanups warm water is recommended.

Limitations:

Symons Plywood Edge Seal cannot be applied below 30°F. The coating is water based and therefore poses no VOC concerns. No extraordinary precautions must be taken with this product.

Product Specifications:

Part Code: F65009

Description: Plywood Edge Seal (Gray)

Packout: 5 Gallon Buckets

Weight: 50 LBS.
