Slab-Werks™

By Dayton Superior

Project Planning Made Simpler

- Quickly generate an accurate report of applicable accessories by inputting a few items of simple slab information
- Performs automated chemical quantity takeoffs with the ability to sort by composition/VOC classification
- Produces slab dowel counts to reduce ordering excess materials
- Automatically determines required bar support size, with the ability to select between all Dayton Superior chairs
- Provides an accurate quantity of panel grout to aid in ordering the right amount the first time
