NOTES:

1. Manufacturer pays exceedance fee which allows use of product under EPA regulations.
 2. 350 g/L for Roadways and Bridges ONLY; for all other applications the VOC is 100 g/L.
 3. All grades of Top-Cast are compliant with all Canadian and U.S. VOC regulations for sealers including Federal EPA, OTC, LADCO, SCAQMD and CARB
 4. SCAQMD requires products to conform to lowest VOC for advertised use, so bond breakers fall under cures
- * Aerosol can products are also measured by MIR (maximum incremental activity) or VOC % by weight. J62 has an MIR of 1.22 and a V.O.C. 51.1% by weight
- ** Only seven Utah counties are under these regulations: Box Elder, Cache, Davis, Salt Lake, Tooele, Utah, and Weber
- *** CO Reg 21 states product must be less than 50% VOCs by weight

SCAQMD: In the State of California, all of Orange County, urban portions of Los Angeles, Riverside and San Bernardino Counties

CARB: State of California, other than those under the SCAQMD regulations

OTC: States of CT, DE, MA, ME, NH, NJ, NY, PA, RI, VT, No. VA, District of Columbia

LADCO: States of IL, IN, MI, OH, WI

EPA: All States not governed by the more restrictive aforementioned regulatory agencies

Maryland: Maryland VOC standards changed January 1, 2017

Utah: Only the following counties are under these regulations: Box Elder, Cache, Davis, Salt Lake, Tooele, Utah, and Weber

Col Reg 21: Colorado VOC standards changed May 1, 2020
