DESCRIPTION

The A3 Snap Tie is manufactured with either hot or cold forged integral heads and is equipped with flats or crimps to prevent turning in the concrete during breakback operations. Coating the tie with wax will aid in breakback operation. Available in standard or heavy duty options.

APPLICATION

Used for handset wood wall forming.

INSTALLATION

1. Drill holes in plywood 1/8" larger than the snap tie head (usually 5/8" diameter drill bit will be required)
2. Place the ends of snap ties through the holes in the plywood
3. Place the bracket (Jahn® "A", Jahn® "C" or Omni wedge) on the tie
4. The proper tie head position is at the midpoint or higher of the Omni wedge slot. Correct spacing between double wales is 5/8" to 3/4"
5. Jahn® "A" bracket is utilized to hold a single wale and can be installed before or after the wales have been positioned
