DESCRIPTION

The P53 Swift Lift Eye Anchor is designed for use with the P60 Tension Bar placed through the eye of the anchor. This combination of Swift Lift Eye Anchor and P60 Tension Bar allows the anchor's full rated tensile load to be developed in thin, narrow wall applications. The anchor should be located at the center line of the wall. When two or more anchors are required, the minimum spacing between anchors must be equal to the minimum panel width.

APPLICATION

The Dayton Superior Swift Lift Eye Anchor (P53) is similar to the P52 Anchor but has an eye at the foot to accept P60 Tension Bars. The P53 anchor is used primarily in thin sections, thin panels of lightweight concrete or shapes that must be handled at concrete compressive strengths as low as 2000psi.

Warning: P60 Tension Bar must be used with this anchor to achieve loads.

Note:

- Minimum Corner Distance must be at least 1/2 Minimum Panel Width.
- 2 or more anchors require a Minimum Spacing equal to the Minimum Panel Width.

FEATURES

- Available in hot-dipped galvanized for extreme corrosion resistance
- The combination of the P53 Swift Lift Eye Anchor and P60 Tension Bar is an excellent system to use for lifting, handling, and setting precast column and thin walls.

TECHNICAL DATA

* Safe Working Load provides a factor of safety of approximately 4 to 1 in 2,000 psi normal weight concrete. The P53 Eye Anchor must be used in conjunction with the P60 Tension Bar in order to develop its published rated working loads.
